

WHY USE A MOLDBASE WITH PEDROTTI STANDARD

CLAMPING SLOTS

Thanks to the ready-made plates, the Pedrotti standard Allows a significant saving in both time and money. Available in two versions, PS + PSX or PSXE.

CHOICE BEYOND COMPARISON

With 17 types of plates, you can customize the mold to your needs. Consult our catalog or the CONFIGURATOR to choose which one is more suitable for you. They are all in stock ready to be delivered.

FIRST QUALITY STEELS FOR EVERY APPLICATION

Toolox33 of SSAB is produced with CSR technology that guarantees purity of the structure up to the core, and therefore the mirror polishability at a much lower price compared to an ESU / ESR steel.

Our **1.2085** is a high quality stainless steel with exceptional workability and stability characteristics.

The **1.1730** is subjected to Stress Relief Annealing for 48 hours to eliminate residual stress and optimize workability.

GUIDED EJECTION PLATES

Why drill and process ejection plates if you can buy them ready?

Order an XE-G or XG moldbase and you will receive already drilled plates, complete with a pillars-and-bushes set for the assembly.

SIMPLE AND QUICK ORDERS

Using the CONFIGURATOR you only have to choose the plates, while the standard elements will be automatically selected. Complete the order with all the accessories and download the 3D models in the favorite format.

EVERYTHING YOU NEED, ALWAYS AVAILABLE

A UNIQUE SUPPLIER

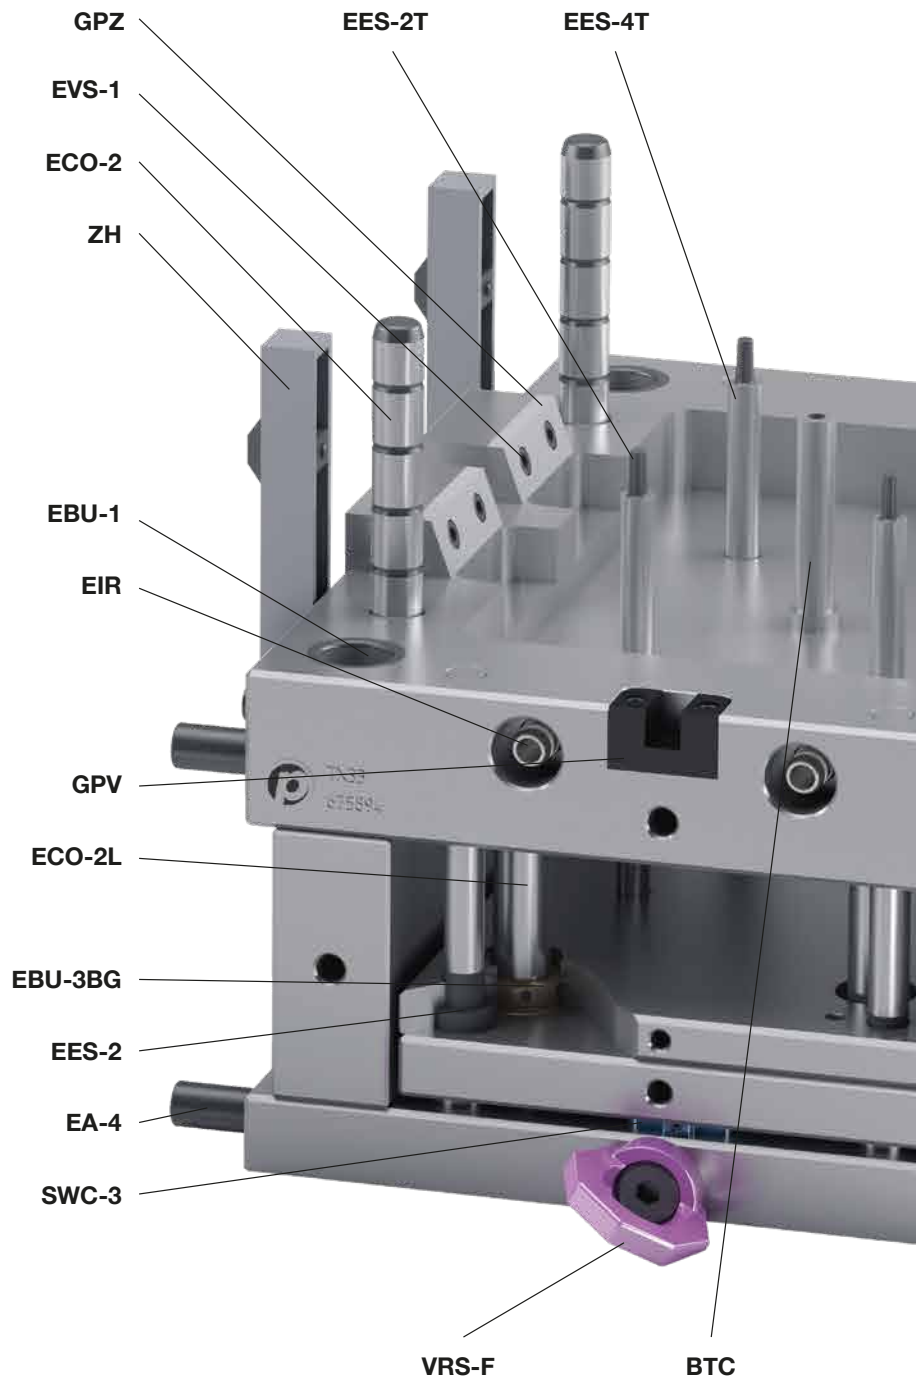

The accessories program is extensive and allows to complete the mold with many standardized elements that guarantee a remarkable time saving.

You can choose among more than twenty thousand items in stock, ready to be delivered: Injection, thermoregulation, centering and plate guiding, lifting and extraction of undercuts, up to the clamping of the mold to the press.

ON DRAWING?

Molds are getting bigger and more complex, that is why many elements must meet more stringent design criteria.

Steel quality, heat treatment procedures completely managed in house, precision in processing and constant quality controls are what you are looking for yours special elements.
